

# Paulo Eduardo Fernandes Rodrigues

Campo Mourão, PR, Brazil - [paulorod.dev@gmail.com](mailto:paulorod.dev@gmail.com) - +55 (44) 99764-8996 - [github.com/pauloffrr](https://github.com/pauloffrr) - Dual Citizenship (US & Brazil) · Fluent in English and Portuguese

---

Java | Spring Boot | SQL | Data Analysis | React

---

## Objective

Seeking a backend or database-focused internship (Java, Spring Boot, SQL), open to frontend challenges with React and TypeScript.

## Higher Education

- Associate Degree in Systems Analysis and Development – Centro Universitário Integrado, Brazil (2024 – 2026)

## Knowledge and Certifications

- Programming languages: Java, TypeScript, SQL · React, Spring Boot
- Languages: English (Fluent), Portuguese (Fluent), Spanish (Basic)
- Tools: Microsoft Excel (Intermediate)
- Python Algorithms (Extension Course, 2024) · Java Algorithms (Academic Project, 2024)

## Extracurricular Activities

- Participation in workshops and lectures at The Developers Weekend – Maringá and Campo Mourão – 2024

## Experience

### Freelancer – Technical Manual Translation (2024)

- Hired to translate a technical instruction manual aimed at international users
- Ensured the content was translated clearly and accurately from Portuguese to English
- Maintained consistent technical terminology by reviewing each section and validating with the client
- The final delivery was approved without corrections, submitted on time, and received positive feedback

### Owner / Attendant - Snack Bar | Campo Mourão, PR, Brazil | Dez 2021 - Dez 2023

- Opened and managed a snack bar as a small business owner.
- Handled all aspects of the operation, including customer service, inventory control, and finances.
- Structured cash flow management, negotiated with suppliers, and oversaw daily operations.
- Kept the business running steadily for two years, with direct customer service.

### Server, City Winery Boston | Boston, MA, USA | Feb 2019 - Jul 2021

- Worked in a fast-paced restaurant with a high volume of diverse customers.
- Handled table service, took orders, organized seating, and supported daily operations.
- Collaborated with kitchen staff to ensure smooth service and customer satisfaction.
- Developed agility, responsibility, and the ability to perform well under pressure.

## Practical Projects

### Shoe Store System – Java & Spring Boot (Tech Academy 4)

- Team-based academic project for a sales system of a fictional shoe store.
- Developed the backend using Java, Spring Boot, and a relational database.
- Designed tables (such as Order, Item, and Payment), implemented business rules with stored procedures and triggers, and structured the API routes.
- The system was delivered fully functional, with complete features for registration, querying, and order management.

### Streaming Platform – React & TypeScript (Tech Academy 5)

- Full stack academic project developed in a team.
- I was responsible for the interface, using React, Vite, and TypeScript.
- Integrated with the backend via API, with navigation using React Router and validated forms.
- The application was delivered with a responsive interface, prioritizing user experience.
